Graded Quiz due Dec 16, 2023 22:09 IST Completed

Question 1

1/1 point (graded)

The Node.js framework doesn't provide many features for building web apps. What do developers

Correct: Developers rely on external libraries and packages to extend the core Node.js functionality. Submit You have used 2 of 2 attempts Question 2 1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure. However, depending on XML data complexity, string matching might be more efficient than what? No alternative; string matching is never more efficient. An XML root element An XML tree of the data An XML attribute structure Answer	rely on to extend Node.js features?
● External libraries and packages JavaScript Answer Correct: Developers rely on external libraries and packages to extend the core Node.js functionality. Submit You have used 2 of 2 attempts Question 2 1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure. However, depending on XML data complexity, string matching might be more efficient than what? No alternative; string matching is never more efficient. An XML root element An XML tree of the data An XML attribute structure Answer Correct: String matching might be more efficient than building an XML tree of the data.	Timely updates
Answer Correct: Developers rely on external libraries and packages to extend the core Node, js functionality. Submit You have used 2 of 2 attempts Question 2 1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure. However, depending on XML data complexity, string matching might be more efficient than what? No alternative; string matching is never more efficient. An XML root element An XML tree of the data An XML attribute structure Answer Correct: String matching might be more efficient than building an XML tree of the data.	
Answer Correct: Developers rely on external libraries and packages to extend the core Node.js functionality. Submit You have used 2 of 2 attempts Question 2 1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure. However, depending on XML data complexity, string matching might be more efficient than what? No alternative; string matching is never more efficient. An XML root element An XML tree of the data An XML attribute structure Answer Correct: String matching might be more efficient than building an XML tree of the data.	External libraries and packages
Correct: Developers rely on external libraries and packages to extend the core Node.js functionality. Submit You have used 2 of 2 attempts Question 2 1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure. However, depending on XML data complexity, string matching might be more efficient than what? No alternative; string matching is never more efficient. An XML root element An XML tree of the data An XML attribute structure Answer Correct: String matching might be more efficient than building an XML tree of the data.	
 An XML root element An XML tree of the data An XML attribute structure ✔ Answer Correct: String matching might be more efficient than building an XML tree of the data. 	Answer Correct: Developers rely on external libraries and packages to extend the core Node.js functionality. Submit You have used 2 of 2 attempts
 An XML root element An XML tree of the data An XML attribute structure ✔ Answer Correct: String matching might be more efficient than building an XML tree of the data. 	1/1 point (graded) One disadvantage of manual parsing is that string matching ignores the XML data structure.
 An XML tree of the data An XML attribute structure ✔ Answer Correct: String matching might be more efficient than building an XML tree of the data. 	No alternative; string matching is never more efficient.
An XML attribute structure Answer Correct: String matching might be more efficient than building an XML tree of the data.	O An XML root element
Answer Correct: String matching might be more efficient than building an XML tree of the data.	An XML tree of the data
Correct: String matching might be more efficient than building an XML tree of the data.	An XML attribute structure
	Correct: String matching might be more efficient than building an XML tree of the data.

Question 3

1/1 point (graded)

Which Node.js package can parse a string of XML elements into a JavaScript object?

	-		
O XML-JS			
Express.js			
o xml2js			
Async.js			

M	Graded Quiz Module 3 - Express Web Application Framework Back-end Application Development with Node.js and Express edX
	★ Answer Correct: The xml2js Node.js package parses a string of XML elements into a JavaScript object.
	Submit You have used 1 of 2 attempts
	Question 4
	1/1 point (graded) Which web application framework is based on the Node.js runtime environment?
	○ Async.js
	○ XML-JS
	Express
	JSON
	Answer Correct: Express is a web application framework based on the Node.js runtime environment. Submit You have used 1 of 2 attempts
	Question 5 1/1 point (graded) The Node.js framework treats HTTP requests at a lower network level. In contrast, Express implements an app class for what purpose?
	Cookup web services
	Access a URL
	Map to a web resource path
	Parse through a network path
	✓

Answer

Correct: Express implements an app class that you map to a web resource path.

Submit

You have used 1 of 2 attempts

Question 6

1/1 point (graded)

What do you call to create a web server object to listen for incoming requests on a port?

http.view		
app.request		

	app.request					
--	-------------	--	--	--	--	--

Graded Quiz Module 3 - Express Web Application Framework Back-end Application Development with Node.js and Express ec	iΧ
○ http.name	
Answer Correct: You call app.listen to create a web server object that listens to incoming requests on the spect port. Submit You have used 1 of 2 attempts	ified
Question 7 1/1 point (graded) Which of the following kind of task is middleware most useful for? Routing	
Error handling	
Performing large calculations	
O Parsing strings	
Answer Correct: Middleware is helpful to handle errors. Submit You have used 2 of 2 attempts	
Question 8	
1/1 point (graded) Which type of authentication is widely used for password recovery by providing a magic link t user?	o the
Passwordless	
O Token-based	
Single Sign On	
○ Session-based	
Answer Correct: Passwordless authentication is widely used for password recovery.	

Submit You have used 2 of 2 attempts

Question 9

1/1 point (graded)

Which statement regarding the jsonwebtoken.verify() method is true?

2/2/23, 10:42 PM	Graded Quiz Module 3 - Express Web Application Framework Back-end Application Development with Node.js and Express edX It is used to return an HTTP status code.
	It is used to verify a JSON web token.
	O It is used to return a response.
	It is used to generate a JSON web token.
	✓ Answer
	Correct: The jsonwebtoken.verify() method is used to verify a JSON web token.
	Submit You have used 1 of 2 attempts
	Question 10
	1/1 point (graded) Which library and module are suited for black-box testing REST APIs?
	○ Koa/SuperTest
	Mocha/SuperTest
	Express/TestAPI
	O Postman/TestAPI
	Answer Correct: The Mocha library has a module called SuperTest which can help you black-box test REST APIs.
	Submit You have used 1 of 2 attempts
